PEARSON'S NURSERY

"Quality Plants for Particular People"

ROLLIN' ACRES

We are budget conscious here on the farm this year and believe that this is the best means of bringing to you our list for 1956.

PEARSON'S NURSERY requests that you use our 1955 catalog if you have questions on cultural practices.

The strawberry varieties listed below are chosen with great care for your consideration. We are certain that you will enjoy our choices. All varieties are listed in the order that they ripen for us.

- VALENTINE - Very early, sweet, large berry.
- JAMBEREE - The only real wild flavored berry in cultivation. Fruit is sweet, about half as large as a Howard and grows in large clusters. A very excellent berry for freezing and in preserves.
- PATHFINDER - Our choice of the early berries - large, bright red and a money maker.
- HOWARD 17 - Always an old faithful.
- DORSETT - Large, bright red.
- FAIRFAX - One of the best in quality, very large.
- PHELPS - A U.N.H. introduction with vigor, excellent flavor and good runner habits. This is a strawberry you'll try and never be without.
- SPARKLE - For us this is another old faithful midseason berry. A good freezer.
- TEMPLE - Equal to Sparkle and a heavier producer. Conical shaped, deep red and firm.
- ORLANDS - A new dependable producer of excellent quality.
- MIDLAND - An excellent producer of plants and fruit. Worth a trial anywhere.
- EMPIRE - This berry has eye appeal with size and quality to match.
- ROBINSON - Very popular on roadside stands.
- CATSKILL - Long known as a heavy land berry. Excellent freezer.
- BLAZE - A U.N.H. introduction. In 1955 trials this was the top producer against all standard varieties. Bears large fruit for two weeks.
- NH F-13 - Another U.N.H. introduction. A late bearing, good quality berry.
- STRAFFORD - U.N.H. introduction. The last of them all to ripen.

RASPBERRY VARIETIES

We are proud of our three raspberry varieties. Quality and usefulness are the passwords in our selection.

- NEW HAMPSHIRE RED RASPBERRY - (Just released) Here you are! The nearly perfect summer bearer, originated at U.N.H. An ideal replacement for many old disease infested varieties. Prolific long bearing with large, sweet, firm fruit. Disease free plants grown from original stock. We believe this is a raspberry with a future. (See enclosed Brochure)
- VIKING RED RASPBERRY - An old favorite tall growing prolific raspberry. Its flavor is a real treat. Bears in early July.
- DURHAM EVERBEARER - The raspberry that has swept the country. Ripens a spring crop in early July and a fall crop August 20th thru Oct. 15th. No garden is complete without the DURHAM. (See enclosed Brochure)
